

Language for Professionals

Agnew Multilingual is pleased to announce the launch of intensive language instruction programs for professionals. The initial series is *Spanish for Professionals*, available now, which will be followed by Russian, Chinese, Arabic, and other languages starting in January 2012.

Spanish for Professionals is a 15-hour, fully-customized language program designed to increase communication and cultural understanding, enhance relationships, and ultimately improve productivity. The program meets once a week for six consecutive weeks, during which time participants will acquire Spanish language skills to support their work environments.

The *Spanish for Professionals* series gives participants confidence when speaking and listening in Spanish by emphasizing communication with colleagues and clients for professional success. Programs can be designed for any industry, including healthcare, retail, banking, manufacturing, real estate, and sales. Learning is practice-based with industry-specific vocabulary, role-play exercises, and interactive presentations. Much of the learning is done in groups or with partners, making it a relaxed and cooperative learning environment.

Upon completion of Level One, participants will have the necessary skills to greet colleagues or clients, exchange valuable work or product information, explain job requirements, policies, and deadlines, and, most importantly, understand the responses they receive. Also available are Level Two, Level Three, and subsequent Advanced Workshops designed to increase vocabulary, develop advanced dialogue skills, and improve understanding of in-depth discussions.
